Notes
 TWUL has provided an extract from their DGS Flood Register for the study area. Due to data protection requirements the data has not been provided at individual property level; rather the register comprises the number of properties within 4 digit postcode areas that have experienced flooding either internally or externally within the last 10 years. It should be noted that records only appear on the DGS register where they have been reported to TWUL, and as such they may not include all instances of sewer flooding.

1. This map is intended to provide a strategic overview of historic sewer flooding and should not be used to assess flood risk for individual properties
