## Important Notice: Disclaimer

The Strategic Land Availability Assessment (SLAA) is a key part of the evidence base that will be used to inform the Council's future Local Plan but does not in itself constitute planning policy. It is important to note that the SLAA does not formally allocate sites for development and the identification of a site in this document as having the potential for housing or other development is based on the evidence before the Council at the time of writing. The SLAA will not prejudice the determination of any subsequent planning application for that site nor does it influence the Council towards the favourable consideration of any future planning applications for the development of that site.

Any comments made in relation to a particular site do not constitute a planning brief or formal planning advice.

All proposals for housing development arising during the plan period will be considered on their individual merits in relation to adopted and emerging development plan policies and other material considerations relevant at the time of determination. At this present time all planning applications are being assessed according to the adopted development plan.

Applicants will have to carry out their own assessment of a site in order to identify any constraints and should not rely on any part of the SLAA to support an application.

The yield set out in the SLAA is indicative of the potential supply that could come from the sites included.

The Council accepts no liability for any costs, liabilities or losses arising as a result of the use of, or reliance upon, the contents of this report.

## Executive Summary

The purpose of the SLAA is to help the Council identify specific sites that will help meet housing and/or employment requirements within Spelthorne.

The Strategic Land Availability Assessment (SLAA) has been produced in accordance with national planning policy and guidance and the jointly produced SLAA methodology with Runnymede Borough Council (published in December 2021), who share the same Housing Market Area (HMA).

The SLAA has not been jointly prepared with neighbouring authorities on the basis that these authorities are at different stages of Local Plan preparation. However, this does not preclude the authorities producing a joint SLAA in the future and officers in the Runnymede/Spelthorne HMA will continue to work collaboratively and on an ongoing basis with each other on matters related to meeting housing and other development needs.

The SLAA evidence is used to assist the Council in identifying the supply of housing, which will help deliver the objectively assessed housing requirement across the HMA, as far as possible. The outcomes in relation to the housing supply will form the basis for ongoing conversations with Runnymede Borough Council and other neighbouring authorities in relation to how any unmet housing need will be addressed.

285 sites have been considered as part of this process, utilising a number of sources of supply. A list of all sites deemed deliverable and developable can be found at Appendix 5 and the site assessments are available on request from the Strategic Planning Team.

43 sites are considered to meet the SLAA site criteria and are deemed suitable, available and achievable for development and therefore could be delivered within the first five years of the Plan. Taking account of sources of supply and assumptions, officers estimate that the five year supply of housing from 31 March 2022 is 3,701 units<sup>1</sup>, which includes sites under construction. The sites identified through the call for sites exercise and classified as Green Belt are available in Appendix 3. These sites are not included within the SLAA yield of housing and will be subject to further consideration through the Local Plan.

---

<sup>1</sup> Minus a 5% under delivery discount.

# 1. Introduction

- 1.1 The Strategic Land Availability Assessment (SLAA) has been produced in accordance with the jointly produced SLAA methodology between Spelthorne and Runnymede Borough Councils, who are identified as sharing the same Housing Market Area (HMA), evidenced through the Runnymede/Spelthorne Strategic Housing Market Assessment (SHMA), first published in November 2015.
- 1.2 In September 2017 the Government published its consultation, '*Planning for the Right Homes in the Right Places*', setting out a number of proposals to reform the planning system to increase the supply of new homes and increase local authority capacity to manage growth. Included was a proposed new standardised methodology for calculating local authorities' housing need. In February 2019 Planning Practice Guidance<sup>2</sup> was updated to confirm the requirement to use the standard method, with a current Local Housing Need of 618 dwellings per annum for Spelthorne.
- 1.3 The SLAA identifies the land supply in the Borough, which will help meet identified housing needs. The SLAA is based on data up to 31 March 2022 and presents a snapshot of current supply. The SLAA is however a live document and will be updated as new information emerges.
- 1.4 The SLAA also identifies land for other uses besides housing to help meet employment needs. The Council has produced an Employment Land Needs Assessment (ELNA) which assesses economic development needs in line with national policy. The SLAA and the ELNA will inform subsequent work as part of the new Local Plan to evaluate specific employment allocations and determine where growth should be accommodated across the Borough.
- 1.5 The SLAA is a policy neutral document and the inclusion of a site in it does not mean that it will necessarily be allocated in the Development Plan or gain planning permission.

## 2. Methodology

### Stage 1: Identification of sites and broad locations

2.1 Planning Practice Guidance (PPG) sets out a recommended methodology to follow when preparing SLAAs. This process is summarised in Figure 1.

**Figure 1: SLAA Methodology**

- 2.2 This assessment has been prepared using the detailed SLAA Methodology produced jointly by Spelthorne and Runnymede Borough Councils. The methodology is based on the PPG and the processes summarised in Figure 1.
- 2.3 Planning Practice Guidance sets out that a land availability assessment should be undertaken working with other local planning authorities in the relevant housing market area or functional economic market area. It is important to note that the HMA authorities are at different stages in their plan making process and it is therefore not practical for a joint SLAA document to be prepared for the entire HMA at this time. This does not however preclude the authorities producing a joint SLAA in the future. A methodology regarding the assessment/inclusion of sites has been agreed by the two authorities. By using a common methodology, it is possible to assimilate readily the information from across the HMA and FEA, extending the picture of housing and economic land supply across the entire area, in line with the Duty to Co-operate.
- 2.4 A list setting out the sources of supply considered in the SLAA is provided in Appendix 1. This includes the call for sites exercise; existing allocations; sites within or previously in the planning process; and an officer search of the Borough's urban areas.
- 2.5 A total of 285 sites were considered through the SLAA, with 66 discounted because they were complete; were considered as part of a wider SLAA site; did not meet the threshold; or were deemed unsuitable or confirmed as not available by landowners (Appendix 2). A further 88 sites were identified as Green Belt and so were discounted at this stage. These sites will be subject to further consideration through the site selection process<sup>3</sup>.
- 2.6 In 2017 an independent Green Belt Assessment was produced for the Council by ARUP. The purpose of the Green Belt Assessment Stage 1 was to provide evidence of how different areas perform against Green Belt purposes as set out within the NPPF. This study identified a number of weakly performing local areas and several local areas for potential sub-division. Subsequently the Green Belt Assessment Stage 2 was produced. This report considers smaller sub-areas of Green Belt and takes a more fine-grained approach to Green Belt assessment. The results of this study have informed the SLAA assessment of those sites that are situated within the Green Belt.
- 2.7 The Council has produced a Green Belt Assessment Stage 3 as part of the Regulation 19 Local Plan. This focused on the sites identified for allocation through the Plan.
- 2.8 Sites within the Green Belt are not currently included within the potential supply of land and will be considered through the Local Plan process. A separate schedule of sites located in the Green Belt is provided in Appendix 3.
- 2.9 The SLAA has been informed by evidence available to the Council up to 31 March 2022, setting out the current position. Those local areas of Green Belt identified as weakly performing or for further consideration, as set out in the Green Belt Assessment Stage 1 and Stage 2, will be further considered through the Local Plan process. In line with national policy, it is only through the Local Plan process that Green Belt boundaries can be altered<sup>4</sup>.
- 2.10 It is also noted that the possible expansion of Heathrow Airport may have implications for land in the north of the Borough. The future expansion of Heathrow Airport is uncertain at present. Sites that could be susceptible to acquisition as part of an expansion of Heathrow Airport have been assessed independent of this through the

---

<sup>3</sup> The Site Selection Methodology can be found at: <https://www.spelthorne.gov.uk/localplan>

<sup>4</sup> National Planning Policy Framework 2021, paragraph 140.

SLAA and based on current available evidence. This does not preclude the development of Green Belt land through very special circumstances in the future through any possible expansion of the Airport.

## **Stage 2: Site/broad location assessment**

- 2.11 The SLAA methodology sets out the approach taken to assessing sites, including the constraints impacting the suitability of a site for development.
- 2.12 Where considering sites for residential use, the assessment focuses on sites delivering 5 net new housing units or greater, in compliance with advice contained within the PPG<sup>5</sup>.
- 2.13 Where a site has received planning permission or is in the planning process, it has been deemed available. Landowners have been contacted to establish whether sites are being considered for development, the time frame and the potential use.
- 2.14 Where landowners have yet to confirm the availability of a site and it has been deemed suitable, sites have been recorded as developable and included in the 11-15 year period. The SLAA is a live document and will be reviewed regularly, taking into account the most up to date information available.
- 2.15 The assessment of achievability was principally derived from the results of suitability and availability considerations. A site was largely deemed to be achievable if it was considered both suitable and available and there were no other major barriers to development. Sites cannot be considered achievable by definition in the first five years if they have been identified as unsuitable or unavailable during this time. Where a site may be available beyond five years and is suitable, an estimate of when it could come forward and its capacity has been provided. The Council has produced a viability assessment for the emerging Local Plan. This evidence has fed into the SLAA.
- 2.16 Site capacity has been assessed based on various factors including density considerations, site constraints, planning history, the sustainability and accessibility of a location and the area's wider character. The Council's GIS mapping system was utilised to estimate the potential yield of a site.
- 2.17 Call for sites submissions included information to assist officers in determining an appropriate yield on site and the timing of delivery. Further input was received from the Council's Asset Management and Planning Development Management teams.
- 2.18 Sites contained in the SLAA have informed the Council's Brownfield Register<sup>6</sup> which is a government requirement.

## **Stage 3: Windfall Assessment**

- 2.19 Annex 2 of the NPPF states that windfall sites are 'sites not specifically identified in the development plan'. In Spelthorne, this historically applies to small-scale sites.
- 2.20 As set out in the NPPF and the SLAA methodology, small-scale windfall has consistently formed part of the housing supply in Spelthorne and so the SLAA will continue to include a windfall allowance in the housing trajectory.

---

<sup>5</sup> Housing and economic land availability assessment, Reference ID: 3-010-20190722

<sup>6</sup> <https://www.spelthorne.gov.uk/brownfield>

- 2.21 Appendix 6 sets out how windfall allowances for both small sites and prior approval notifications have been determined.
- 2.22 An allowance of 41 units per annum is considered appropriate to take account of development coming forward on small sites. Small sites accommodating 4 net units or less are included within the windfall allowance.
- 2.23 Prior approval notifications for office to residential conversions can also make a contribution towards the supply of housing. An allowance is not included in years 1-5 as granted permissions and identified sites are relied on due to the increased certainty associated with this source of supply. An allowance is however included in years 6-15 due to the difficulty of accurately identifying specific sites that could be converted from office to residential use through the (General Permitted Development) (England) (Amendment) Order 2016 in the long term. This approach is considered to avoid double counting.
- 2.24 An allowance based on previous completion trends has been included with a discount factor applied to each five year time period to account for the likely reduction in supply and market appetite. As such an allowance for 32 units and 16 units per annum has been made for years 6-10 and 11-15 respectively. Appendix 6 provides further detail.
- 2.25 Beyond Year 15, it is considered there is too much uncertainty and therefore the SLAA will only consider a rolling 15-year delivery period to ensure a greater degree of confidence in what will be delivered.

#### **Stage 4: Assessment review**

- 2.26 Once the sites and broad locations had been identified, the development potential of each site was assessed and used to produce an indicative trajectory. This sets out each site's development potential and when these sites could be developed (in years 1 to 5, years 6 to 10 or years 11 to 15).

##### Deliverable sites

- 2.27 This includes sites of 5+ units with planning permission whereby the development is under construction; sites of 5+ units which have planning permission but construction has not yet commenced; and sites which do not have planning permission but there is a realistic prospect that housing will be delivered on the site within five years. This includes confirmation of their deliverability in the 1-5 year timescale from the relevant landowners.

##### Developable sites

- 2.28 The NPPF requires local authorities to identify developable sites as part of the assessment. These are sites able to accommodate 5 or more net new units and are considered to be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed within years 6-15. These sites have a lower degree of certainty attached to them and are not expected to come forward in the next 5 years.
- 2.29 Landowners of developable sites have been contacted to confirm the availability of sites, however a number have yet to be confirmed. These have therefore been included within the latter stages of the supply period due them being suitable but potentially available within the long term. The SLAA is a live document and will be reviewed regularly to take account of any new information that may emerge.

- 2.30 Appendix 5 sets out the delivery estimates of appropriate SLAA sites.
- 2.31 Any sites that were under the appropriate thresholds (unable to accommodate 5 net dwellings or economic development on sites of 500sqm floor space); were confirmed as unavailable by landowners; or had complexities that would limit the achievability of a site have been excluded. Small sites are taken account of through windfall calculations within the SLAA.
- 2.32 In order to help identify a realistic housing supply, non-implementations have been considered in order to determine an 'under delivery discount'. Expired planning permissions have been considered against granted planning applications over a period between 2011 and 2022. Historic trends in Spelthorne have shown that it is rare for sites that enter the planning system to not be developed at all, therefore account has been taken of those sites that have been subject to a renewed or replaced planning permission. Appendix 4 sets out the non-implementation calculation.
- 2.33 A figure of 5% has been applied as an under-delivery discount to sites that do not benefit from planning permission or do have planning permission but have not yet commenced.
- 2.34 This is not applied to the windfall allowance as this has been derived from completions only and there is no evidence to suggest a significant downward trend in small-scale windfalls over the 15-year period in Spelthorne. An alternative discount has been applied to prior approval notifications to account for the likely decrease in supply over time.

### **Stage 5: Final evidence base**

- 2.35 The SLAA methodology sets out the requirements of the NPPF for local planning authorities to identify and update annually their housing land supply evidence for the plan period.
- 2.36 The objectively assessed housing need (OAN) derived from the Government's standardised methodology identifies a need of 618 dwellings per annum in Spelthorne. Table 1 provides an approximation of the likely land supply in the Borough over the next 15 years. It should be noted that the estimated supply set out in Table 1 refers only to urban sites, with further assessment work to be completed for all urban and Green Belt sites through the site selection process. This will inform the site allocations to be taken forward to the next stage of the Local Plan.

2.37 The SLAA site assessments estimate the land supply over the Plan period, broken down by type, as follows:

Table 1: Estimated Delivery of SLAA Sites

Delivery Period	Supply of dwellings *with 5% under delivery discount
<b>Deliverable sites in years 1-5</b>	<b>3,701</b>
Under Construction	1,109
Granted Planning Permission	882
Identified Sites	1,508
Small Sites	202
<b>Developable sites in years 6-10</b>	<b>2,831</b>
Identified Sites	2467
Small Sites	202
Prior Approval	161
<b>Developable sites in years 11-15</b>	<b>2,399</b>
Identified Sites	2117
Small Sites	202
Prior Approval	81
<b>Total</b>	<b>8,931</b>
<b>Per year delivery (average over 15 years)</b>	<b>595</b>

2.38 A Housing Trajectory is available in the 2022 Authority Monitoring Report. Please note that whilst the SLAA considers the prospective delivery of sites across a 15-year period from a base date of 31 March 2022, the Housing Trajectory produced for the Local Plan and the Authority Monitoring Report includes a 15-year period that does not include the current year, starting from 1 April 2023. As such figures may vary.

2.39 The Council will monitor the delivery of sites through its Authority Monitoring Report, which will help to update the SLAA on an annual basis.

### 3. Conclusions, monitoring and next steps

- 3.1 The evidence contained within this SLAA will help the Council to maintain an up-to-date list of the sites able to contribute to its housing land supply. Spelthorne Borough Council submitted its draft Local Plan to the Secretary of State for Levelling Up, Homes and Communities for independent examination on 25 November 2022. Information on the examination and further detail on the proposed allocations is available online<sup>7</sup>.
- 3.2 The current SLAA is based on sites within the urban area, whereas the Local Plan strategy includes an element of small-scale Green Belt release. It is anticipated that on adoption, those sites currently designated Green Belt and identified for allocation will be de-designated. As such, allocation sites will form part of SLAA update once the Local plan has been adopted.
- 3.3 The SLAA is a live document. Therefore if any member of the public, developer, landowner/agent has any further information that they would like to submit in relation to a site, or wish to submit a new site for consideration in the SLAA, the relevant information should be sent to the Strategic Planning Team at [planning.policy@spelthorne.gov.uk](mailto:planning.policy@spelthorne.gov.uk) or Strategic Planning Team, Spelthorne Borough Council, Knowle Green, Staines upon Thames, TW18 1XB.

## Appendices

### Appendix 1 – Sources of Supply (deliverable and developable sites)

	No. of Residential units <sup>8</sup>	Notes
<b>Call for sites</b>	2,270	Discounting all sites in the Green Belt <sup>9</sup> .
<b>Publicly owned sites – Spelthorne BC and Surrey CC</b>	1,576	
<b>Sites with planning permission – under construction</b>	1,109	
<b>Granted applications - currently unimplemented/ outstanding</b>	882	
<b>Sites in the planning system, pending consideration &amp; subject to pre-application discussions</b>	667	
<b>Expired, refused and withdrawn planning application sites</b>	463	
<b>Officer identified sites in urban area</b>	1,116	Owners contacted to confirm the availability of sites.
<b>Windfall allowance (Small sites &amp; Prior Approval)</b>	849	
	8,931	

<sup>8</sup> Minus 5% under delivery discount.

<sup>9</sup> The SLAA supply comprises sites in the urban area only. Green Belt sites are considered through the Local Plan.

## Appendix 2 – Deleted sites

Site ID	Address	Street	Settlement	Reason for Deletion
AC1/003	Land at 201	Feltham Hill Road	Ashford	Below threshold
AC1/005	8-12	Junction Road	Ashford	Not available
AC1/006	12	Park Road	Ashford	Below threshold
AC2/001	192	Feltham Hill Road	Ashford	Below threshold
AC3/004	DC Hill & Son (Textiles) Ltd, Hill House	Alexandra Road	Ashford	Below threshold
AC3/005	195	Staines Road West	Sunbury	Not available
AC3/006	51-53	Alexandra Road	Ashford	Not available
AC3/007	87	Cadbury Road	Ashford	TPOs major constraint on site
AE1/001	525	Staines Road West	Ashford	Below threshold
AE2/001	1-3	Echelforde Drive	Ashford	Below threshold
AE3/007	R/O 6-10	Reedsfield Road	Ashford	Multiple ownerships
AE3/008	21	Chattern Hill	Ashford	Below threshold
AS1/006	Garage Court to rear of	Elsinore Avenue	Stanwell	Below threshold
AS1/007	Garage Court to rear of	Ensign Way	Stanwell	Below threshold
AT1/001	Hitchcock and King	Stanwell Road	Ashford	Retail use implemented
AT1/010	Harper House	Fordbridge Road	Ashford	Already self-contained units on site
AT2/002	156-158	Chesterfield Road	Ashford	Below threshold
AT3/010	37-39	Woodthorpe Road	Ashford	Not available
AT3/014	176	Stanwell Road	Ashford	Below threshold
AT3/015	68	Church Road	Ashford	Below threshold
HS2/001	The Grizzly Bear Public House, 101	Nursery Road	Sunbury	Below threshold
HS2/002	Land Adjacent 55	Layton's Lane	Sunbury	Included in larger site (HS1/010)
LS2/002	10	Squire's Road	Shepperton	Below threshold
LS2/003	Hall Adj. 68	Wood Road	Shepperton	Below threshold
LS2/004	The Bull, 152	Laleham Road	Shepperton	Not available
LS2/005	Between 27+29	Mandeville Road	Shepperton	Below threshold
LS2/006	Garages	Greeno Road	Shepperton	Below threshold
LS2/007	55	Squire's Bridge Road	Shepperton	Below threshold
LS3/002	Adj. 84	Hetherington Road	Shepperton	Below threshold
LS3/003	West of 86	Hetherington Road	Shepperton	Below threshold
LS3/005	404-412	Staines Road West	Ashford	Not available
LS3/006	Adj. 3	Millfield	Sunbury	Below threshold
LS3/009	Osmanstead	Condor Road	Laleham	Below SLAA threshold
RL1/002	Works, 20	Ruskin Road	Staines	Below SLAA threshold
RL1/003	N of (r/o 75,77 Penton Road)	St Olave's Close	Staines	Multiple owners

Site ID	Address	Street	Settlement	Reason for Deletion
RL1/004	S of (r/o 119-121 Penton Rd)	St Olave's Close	Staines	Multiple owners
RL1/005	161-162	Thames Side, pt Arcadia Caravan site and 15 Riverway	Laleham	Not available
RL1/006	43-44	Thames side	Staines	Not available
SC1/012	T Mobile (UK) Ltd, Sunbury One	Brooklands Close	Sunbury	Not available
SC1/016	RO Grandera House, 61-73	Staines Road West	Sunbury	PP refused
SE1/001	Park House, 17-19	Park Road	Sunbury	Included in PDO windfall allowance
SE1/006	Saxon House	Downside	Sunbury	Included in PDO windfall allowance
SE1/009	Manor Farm Cottage, 126	Green Street	Sunbury	Below SLAA threshold
SE1/013	Dart House	Thames Street	Sunbury	Below SLAA threshold
SE2/002	292/294	Staines Road East	Sunbury	Not available
SH1/001	The Anchor Hotel	Church Square	Shepperton	Dry island and no means of escape. Not suitable
SH1/006	6	Green Lane	Shepperton	Below threshold
SH2/001	Land at	Station Road	Shepperton	TPOs
SH3/004	Shepperton Autoway	Walton Bridge Road	Shepperton	Not available
SH3/006	Shepperton Service Station	Walton Bridge Road	Shepperton	Not available
SN1/002	Camgate Centre	Long Lane	Stanwell	No net gain in commercial floorspace
SS1/001	Garages to the rear of 145-149	Kingston Road	Staines	Below threshold
SS1/003	Land at	Hensworth Road	Ashford	Below threshold
SS3/002	152-154	Commercial Road	Staines	Flood Risk
SS3/003	27	Gordon Close	Staines	Below threshold
ST1/001	White Lodge & Land to North/Brecknock	Stanwell New Road	Staines	Below threshold
ST1/004	193	London Road	Staines	Commercial
ST1/006	233-269	London Road	Staines	Commercial
ST1/010	189	London Road	Staines	Below threshold
ST1/011	181	London Road	Staines	Below threshold
ST1/030	Fairways Day Centre	Knowle Green	Staines	No change - contact SCC for evidence for early delivery
ST2/009	55	Cherry Orchard	Staines	Below threshold
ST2/010	2	Glebe Road	Staines	Below threshold
ST3/003	Land off	Pullmans Place	Staines	Not available
ST3/005	8-17	Kingston Road	Staines	Not available
ST4/003	Hanover House	Bridge Street	Staines	Included within Bridge Street carpark

## Appendix 3 - Green Belt Sites

Sites in the Green Belt have not been included within the SLAA housing supply figure. Urban sites can be brought forward at any time without an allocation and so form part of the current housing supply position. Green Belt sites have been considered through the Local Plan process and allocation sites have been identified. The case for release will be assessed through the Local Plan examination process.

### CONSIDERATION AS TO WHETHER ANY OF THESE SITES WILL BE ALLOCATED WILL BE CONSIDERED THROUGH THE LOCAL PLAN PROCESS

Site ID	Address	Street	Settlement	Site area (ha)	Land type <sup>10</sup>	Comments
AC3/001	Lakeside	Chertsey Road	Sunbury	2.29	GF, GB	GBA 1 local area 17: strongly performing. GBA 2 sub area 17-a: moderately performing; partly less important. Promoted for residential/commercial use.
AE1/003	Ashford Manor Golf Club	Fordbridge Road	Ashford	0.56	GF, GB	GBA 1 local area 22: weakly performing (AC-2). GBA 2 sub area 22-a: weakly performing; less important. Promoted for residential use.
AE1/007	Ashford Manor Golf Club (site 2)	Manor Road	Ashford	0.50	GF, GB	GBA 1 local area 22: weakly performing (AC-2). Promoted for residential use.
AE3/009	Land at Chattern Hill	Chattern Hill	Ashford	1.67	GF, GB	GBA local area 10: strongly performing; local area for potential sub-division. GBA 2 sub area 10-b: weakly performing; less important.
AS1/011	Land at former Bulldog Nurseries	London Road	Ashford	0.3	GF, GB	GBA 1 local area 7: strongly performing. Promoted for residential use.
AS2/005	Land to the west of Edward Way	Edward Way	Ashford	1.88	GF, GB	GBA 1 local area 8: strongly performing. GBA 2 sub area 8-b: weakly performing; less important. Promoted for residential use.
AS2/006	Land east of Desford Way	Desford Way	Ashford	3.61	GF, GB	GBA 1 local area 8: strongly performing. GBA 2 sub area 8-a: strongly performing; Important.

<sup>10</sup> GF: greenfield; GB: Green Belt; PDL: previously developed land

Site ID	Address	Street	Settlement	Site area (ha)	Land type <sup>10</sup>	Comments
						Promoted for residential use.
<b>AT1/002</b>	Ashford Sports Club	Woodthorpe Road	Ashford	1.15	GF, GB	GBA 1 local area 18: strongly performing. GBA 2 sub area 18-c: weakly performing; less important. Promoted for residential use.
<b>AT1/012</b>	Ashford Community Centre	Woodthorpe Road	Ashford	0.47	PDL, GB	GBA 1 local area 18: strongly performing. Not assessed at GBA Stage 2.
<b>HS1/002</b>	Land at Croysdale Avenue	Croysdale Avenue	Shepperton	1.68	GF, GB	GBA 1 local area 32: strongly performing; local area for potential sub-division. GBA 2 sub area 32-f: weakly performing; less important. Promoted for residential use.
<b>HS1/003</b>	Land to North of Croysdale Avenue	Croysdale Avenue	Sunbury	2.4	GF, GB	GBA 1 local area 32: strongly performing; local area for potential sub-division. GBA 2 sub area 32-e: moderately performing; Important. Promoted for residential use.

## Appendix 4 - Under-delivery Calculation

Year	Planning permissions granted	Units	Planning permissions expired	Units	Expired units as % of units granted
2011/12	47	283	4	6	2.12%
2012/13	35	388	6	4	1.03%
2013/14	58	348	1	1	0.29%
2014/15	58	511	6	11	2.15%
2015/16	68	543	2	2	0.37%
2016/17	54	634	8	12	1.89%
2017/18	89	1029	4	29	2.82%
2018/19	69	964	8	267	27.70%
2019/20	64	733	4	4	0.55%
2020/21	52	226	4	0	0.00%
2021/22	60	464	19	178	38%
<b>Average (Trimmed Mean)</b>					<b>4%</b>

The table above sets out the percentage of expired units as a percentage of granted units in each year. Generally, this percentage has been relatively low since 2011/12 however there is a noticeable outlier in 2021/22, distorting the average upwards. The outlier relates to a single prior approval scheme owned by Spelthorne Borough Council, however the Council has confirmed that this was not implemented due to a larger scheme across the wider site now in the pipeline.

To account for outliers, the 'Trimmed Mean' function has been applied to determine the average. This method of averaging removes a small, designated percentage of the largest and smallest values before calculating the mean. With regards to the under-delivery calculation, the trimmed mean average has been calculated excluding the top and bottom 10% of the data to provide a more accurate and consistent reflection of under delivery. This has resulted in a rate of 4%. This has been rounded up to 5% when applied to the identified sites in the SLAA.

## Appendix 5 – Estimated delivery of SLAA sites<sup>11</sup>

### Deliverable Sites - Years 1-5<sup>12</sup>

Site ID	Address	Street	Settlement	Time Frame	Status	Yield (net dwellings)	Yield (net commercial sqm)	Comments
AC1/007	Land to the rear of 109	Ashgrove Road	Ashford	Years 1-5	Deliverable	6	0	Full planning permission on site.
AE1/008	487-491	Staines Road West	Staines	Years 1-5	Deliverable	11	0	Full planning permission on site.
AS1/003	Staines Fire Station	Town Lane	Stanwell	Years 1-5	Deliverable <b>Local Plan Allocation</b>	50	0	Pre-application discussions. Surveys to support a planning application are being progressed.
AS1/008	Ashford Hospital (East Yard)	Town Lane	Ashford	Years 1-5	Deliverable	127	0	Full planning permission on site.
AT3/007	Ashford Multi-storey car park	Church Road	Ashford	Years 1-5	Deliverable <b>Local Plan Allocation</b>	45	0	Publicly owned site. Landowner confirmed availability subject to re-provision of existing use.
AT3/016	Land at Woodthorpe Road and Station Approach	Woodthorpe Road	Ashford	Years 1-5	Deliverable <b>Local Plan Allocation</b>	42	0	Pre-application discussions. Surveys to support a planning application are being progressed. Site split into two timeframes (years 1-5 and 6-10)
AT3/017	51-53	Church Road	Ashford	Years 1-5	Deliverable	8	0	Full planning permission on site.

<sup>11</sup> Sites identified for allocation through the Spelthorne Local Plan are identified under 'status'.

<sup>12</sup> This does not include those sites that are already under construction (491 units as of 31<sup>st</sup> March 2021).

Site ID	Address	Street	Settlement	Time Frame	Status	Yield (net dwellings)	Yield (net commercial sqm)	Comments
AT3/018	Atrium 31-37	Church Road	Ashford	Years 1-5	Deliverable	20	0	Full planning permission on site.
AT3/020	Fir Tree Place	Church Road	Staines	Years 1-5	Deliverable	5	0	Scheme of approx. 5 units likely to be overcome design issues. Acceptable in principle.
AT3/019	15	Station Road	Staines	Years 1-5	Deliverable	5	0	Full planning permission on site.
AT3/022	Second Floor Atrium, 31	Church Road	Ashford	Years 1-5	Deliverable	9	0	Pre-application discussions taken place.

## Appendix 6 – Windfall allowances

### Small sites

The NPPF allows Local Planning Authorities to make allowances for small sites. Small sites are known as windfall sites within the NPPF which states “*sites which have not been specifically identified as available in the Local Plan process. They normally comprise previously-developed sites that have unexpectedly become available*”.

Small scale windfall sites have consistently formed part of the housing supply for Spelthorne and so the SLAA will continue to include a windfall allowance as these sites continue to provide a reliable source of supply.

For the purpose of the SLAA, windfall sites in Spelthorne are considered to be sites able to provide up to 4 net dwellings. Spelthorne has historically included sites of less than 0.4 ha as windfall, however in order to account for smaller sites that may be able to accommodate high density development where appropriate, any sites considered able to deliver fewer than 5 net units are taken account of through future windfall supply. This is consistent with the windfall allowance used in the Runnymede SLAA, who sit within the same Housing Market Area. This will help support the opportunity for joint working on the SLAA in the future.

Small sites have been broken down into specific development types: conversion (residential to residential); change of use (non-residential to residential); new build; and redevelopment. This approach will seek to ensure that there is no double counting and those sites that are considered capable of delivering units as part of the housing supply are identified.

In order to determine the potential supply of housing through a windfall allowance over the plan period, completions from April 2011 to March 2022 have been analysed. Based on past trends an annualised figure for windfall sites has been identified for sites that are capable of delivering fewer than 5 net units.

The total figure for windfall completions over the above stated period is 445 and the annualised completions are shown in Table 2.

Table 2: Windfall completions in Spelthorne

Year	Conversion	Change of Use	New Build	Redevelopment	Total
2011 - 2012	1	1	9	21	32
2012 - 2013	5	1	11	5	22
2013 - 2014	2	0	9	9	20
2014 - 2015	20	6	11	11	48
2015 - 2016	0	8	9	10	47
2016 - 2017	5	10	11	10	36
2017 - 2018	9	7	19	11	46
2018 - 2019	15	14	5	29	63
2019 - 2020	12	2	8	22	44
2020 – 2021	9	25	13	38	85
2021 – 2022	10	8	2	2	22
<b>Total</b>	<b>88</b>	<b>82</b>	<b>107</b>	<b>168</b>	<b>445</b>

Table 2 shows that there is a consistent delivery of smaller sites and therefore the inclusion of a windfall allowance in the housing land supply is justified.

It is clear from Table 2 that windfalls have historically made a small but consistent contribution towards the Spelthorne housing land supply. There is no reason to believe that this would not continue, in light of policy contained within the NPPF, especially with regards to the presumption in favour of sustainable development. It is thus considered that a windfall allowance for small sites should be included in the SLAA.

It is considered that a windfall allowance per year is realistic, having been based on past trends over a reasonable period of time. Based on the data collected for the SLAA, there is no evidence to suggest a significant downtrend in small-scale windfalls. Therefore it is considered appropriate to take forward the annual average figure of 41 dwellings over the 15 year plan period as an allowance. This would provide for 202 units in each 5 year period which would form part of the housing supply through the small sites allowance.

### ***Prior Notifications***

Prior approval notifications can also make a contribution towards the housing supply.

Alongside the small site windfall allowance, an allowance will be included for dwellings likely to arise from office to residential conversions carried out under the General Permitted Development order (GPDO). This also includes the 2016 amendment to the GPDO referred to as the (General Permitted Development) (England) (Amendment) Order 2016. This amendment made permanent the existing temporary right to change a building used as an office into residential use. This allowance is informed by the number of prior notifications completed up to and including March 2022.

In total there are 294 units with outstanding prior approval as of 31 March 2022<sup>13</sup>, with an additional 294 units identified in years 1-5 on sites currently in office use. Availability of these identified sites has been confirmed therefore given the higher level of certainty associated with this, an allowance for prior approvals will not be included in years 1-5. This will avoid any double counting.

Office to residential conversions under the GPDO are subject to less control than traditional applications and are less likely to be identified in the latter years of the SLAA as these prior notification sites do not require planning permission and can be approved as permitted development. As such, they are less likely to be identified for housing. Therefore, it is considered that prior notification sites should be considered as part of a separate allowance in years 6-15 when there is less certainty about specific sites.

The GPDO amendment was introduced on 30 May 2013 and therefore completions from this date will only be considered as part of the allowance.

Basing the allowance on past completions rather than approved schemes is considered to give a more accurate indication of how many units could materialise through the prior approval regime. This will also ensure that expired schemes and those that have come forward as subsequent planning permissions instead of initial prior approvals are not counted within the allowance.

In total, on schemes greater than 5 units, 516 units have been completed under the prior approval regime since the GPDO amendment was introduced on 30 May 2013 (Table 3).

---

<sup>13</sup> Schemes of 5+ units and over.

Table 3: Residential Prior Notification completions 2014 - 2022

Year	Number of schemes	Number of units
2014 – 2015	1	6
2015 – 2016	1	41
2016 – 2017	4	129
2017 – 2018	2	90
2018 – 2019	1	110
2019 – 2020	2	26
2020 – 2021	5	106
2021 – 2022	2	8
<b>Total</b>	<b>18</b>	<b>516</b>

In total there have been 516 units completed through the prior approval regime which equates to an average of 65 units per annum since 2014/15. Since the introduction of the regime, latent potential has been released with an initial period of ‘surge’ in activity. It is reasonable to assume that following this initial period of activity, development rates are likely to plateau. If it is assumed that market appetite and stock will decrease over time, it can be deducted that there could be a 50% rate of current completions in years 6-10 and a 25% rate of the current completions in years 11-15. Table 4 details the allowance for each period of the SLAA.

Table 4: Windfall allowance for Office to Residential Prior Notifications

Year	Rate	Allowance
<b>Years 1-5</b>		No allowance – identified sites and approved sites relied on
<b>Years 6-10</b>	50% of current completion rate	161 (32 per annum)
<b>Years 11-15</b>	25% of current completion rate	81 (16 per annum)

It is acknowledged that the office to residential prior notification regime is still relatively new with the potential for a change in current trends moving forward. The allowance provided is based on past data and reasonable evidence, with trends signalling that past activity rates are likely to continue. Ongoing monitoring will be used to keep track of prior approval conversion rates to inform future prior approval allowances which will be reviewed on a regular basis.
